## General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

Export statistics include commercial, Economic Cooperation Administration, 1/ United States Foreign Relief, Interim Aid, Greek-Turkish Aid, UNRRA, and Lend-Lease. Beginning January 1, 1947, they also include exports under the Army Civilian Supply Program for which comparable data for earlier years are not available at the Bureau of the Census. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Prior to July 1945, shipments by and for the account of or consigned to, United States Government agencies and establishments abroad, were also excluded. See note d/, page 17.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea and spices.

1/ As in the case of exports under other special programs, Economic Cooperation Administration exports measure only the exports of merchandise from the United States under the program. The Economic Cooperation Administration export figures will not check with figures on Economic Cooperation Administration authorizations, expenditures, etc., which may include funds used or intended for future exports or for off-shore procurements, etc.

## General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

Export statistics include commercial, Economic Cooperation Administration, <sup>1/</sup> United States Foreign Relief, Interim Aid, Greek-Turkish Aid, UNRRA, and Lend-Lease. Beginning January 1, 1947, they also include exports under the Army Civilian Supply Program for which comparable data for earlier years are not available at the Bureau of the Census. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Prior to July 1945, shipments by and for the account of or consigned to, United States Government agencies and establishments abroad, were also excluded. See note d/, page 17.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

<sup>1/</sup> As in the case of exports under other special programs, Economic Cooperation Administration exports measure only the exports of merchandise from the United States under the program. The Economic Cooperation Administration export figures will not check with figures on Economic Cooperation Administration authorizations, expenditures, etc., which may include funds used or intended for future exports or for off-shore procurements, etc.

## General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

Export statistics include commercial, Economic Cooperation Administration, 1/ United States Foreign Relief, Interim Aid, Greek-Turkish Aid, UNRRA, and Lend-Lease. Beginning January 1, 1947, they also include exports under the Army Civilian Supply Program for which comparable data for earlier years are not available at the Bureau of the Census. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Prior to July 1945, shipments by and for the account of or consigned to, United States government agencies and establishments abroad, were also excluded. See note d/ page 17.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

1/ As in the case of exports under other special programs, Economic Cooperation Administration exports measure only the exports of merchandise from the United States under the program. The Economic Cooperation Administration export figures will not check with figures on Economic Cooperation Administration authorizations, expenditures, etc., which may include funds used or intended for future exports or for off-shore procurements, etc.

## General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

Export statistics include commercial, Economic Cooperation Administration,<sup>1/</sup> United States Foreign Relief, Interim Aid, Greek-Turkish Aid, UNRRA, and Lend-Lease. Beginning January 1, 1947, they also include exports under the Army Civilian Supply Program for which comparable data for earlier years are not available at the Bureau of the Census. Excluded from the export figures are shipments to the United States armed forces abroad for their own use shipments between Continental United States and the Territories and Possessions, and shipments between the Territories and Possessions. Prior to July 1945, shipments by and for the account of or consigned to, United States Government agencies and establishments abroad, were also excluded.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to Agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

<sup>1/</sup> As in the case of exports under other special programs, Economic Cooperation Administration exports measure only the exports of merchandise from the United States under the program. The Economic Cooperation Administration export figures will not check with figures on Economic Cooperation Administration authorizations, expenditures, etc., which may include funds used or intended for future exports or for off-shore procurements, etc.
